I am excited to share that I have embarked on an incredible journey with an Erasmus+ funded project, [iMath - An Intelligent System to Learn Mathematics](#). Our ambitious goal? To revolutionize the way higher education students engage with and excel in mathematics through the power of Artificial Intelligence (AI).

Mathematics is a fundamental area for the development of society and very present in our lives. Yet, it remains a challenging subject for many. iMath aims to bridge this gap by providing an AI-driven tool that personalizes learning, making complex concepts more accessible and engaging for every student.

What makes this project even more special is the team behind it. I am working alongside a group of brilliant people, and I have been lucky enough to work closely with them. Together, we are not just developing a tool; we are crafting a future where every student can unlock their full potential!

I invite you to join us as we explore the possibilities of AI in education and take a look at the website of the project:

<https://lnkd.in/dqPb9rC9>

Let's make learning limitless!

Co-funded by the  
Erasmus+ Programme  
of the European Union
